Summary

Senior Mobile Application Developer with 5+ years building and scaling Android and Flutter apps that serve 1M+ users and process BDT 20M+ in daily transactions. Specialized in Kotlin, Jetpack Compose, and Flutter, with deep experience in Clean Architecture, performance optimization, and release engineering. Track record of shipping stable, high-throughput products — cutting crash rates, accelerating booking flows, and building reusable design systems that speed up delivery across teams.

Work Experience

Senior Software Engineer II

Jan 2022 – Present

Jatri Services Ltd | Rubayet tower, R-24 Gulshan 2, Dhaka

- Led Android and Flutter development for bus-ticketing, rental, and POS products with 1M+ downloads, owning architecture decisions and Kotlin/Jetpack Compose/Clean Architecture standards across the team.
- Shipped core booking features for a ticketing app processing BDT 20M+ in daily sales, streamlining the reservation flow to lift booking completion 15%+.
- Drove a 20% performance gain by optimizing rendering, state management, and app startup — reducing UI jank and memory pressure under load.
- Cut crash rates 25% and raised release stability 20%+ by establishing Firebase Crashlytics monitoring and a faster issue-triage workflow.
- Built a reusable design system and shared component that reduced repetitive UI work 30% and standardized delivery across teams.
- Owned end-to-end release management — app signing, ProGuard/R8, and Play Store deployments — for high-traffic production apps.

Software Engineer

Aug 2020 – Jan 2022

Mononsoft Ltd | TMC building, New Eskaton, Dhaka

- Developed a scalable Order Management Android app (Kotlin, MVVM, Jetpack) covering product, order, inventory, and customer workflows — processing 1,500+ orders/day in business-critical operations.
- Engineered reliable offline/online sync with Room, Coroutines, and local caching, keeping the app responsive in low-connectivity field conditions.
- Managed end-to-end Play Store releases — signing, versioning, and ProGuard/R8 optimization.
- Partnered with product, QA, and backend teams to improve stability and resolve production issues quickly.

Skills

- Languages: Kotlin, Dart
- Android: Android SDK, Jetpack Compose, Jetpack Libraries, Material Design, Navigation Component, WorkManager
- Flutter: Flutter SDK, BLoC, Riverpod, GetX
- Architecture & DI: MVVM, Clean Architecture, Multi-Module Architecture, Hilt, Dagger
- Async & Reactive: Coroutines, Flow, StateFlow, SharedFlow
- Networking & Local Data: REST APIs, Retrofit, OkHttp, Dio, Room, DataStore, SharedPreferences
- Firebase: Crashlytics, Analytics, Cloud Messaging (FCM), Remote Config
- Payments & Billing: Google Play Billing, In-App Purchases, Subscriptions, SSLCOMMERZ, bKash
- Performance & Quality: Performance Optimization, Memory Management, Crash Reduction, App Stability
- UI/UX & Design Systems: Design Systems, Design Tokens, Reusable Component Libraries
- Release & DevOps: CI/CD, Git, GitHub, ProGuard/R8, Play Store Publishing, Release Management

Projects

- [Travel App \(Android\)](#) — Ticket booking, car rental, and journey management for Android users
- [Travel App \(iOS\)](#) — Cross-platform ticket booking and real-time trip tracking for iOS users
- [Rental Partner App](#) — Driver-side app for ride management, vehicle operations, and partner coordination
- [Bus Ticket](#) — POS-integrated ticketing system for seat selection and receipt printing at travel agencies
- [JERP Sales Solution](#) — Sales tracking and inventory management system for field sales operations
- [Ispahani Agro Ltd](#) — Mobile app for agro-business field workflows, reporting, and operational management
- [Rajendra College E-Payment](#) — Education payment app for streamlined student fee collection and transaction records

Achievement

- Promoted twice in ~3 years for sustained high performance and technical leadership.
- Earned Employee of the Month multiple times for consistent delivery and impact.
- Mentored and onboarded junior engineers on Kotlin and Clean Architecture.

Education

Bachelor of Science in Software Engineering

Daffodil International University

CGPA: 3.47 | Year: 2020
