Summary

Senior Mobile Application Developer with 5+ years of experience building scalable Android and Flutter applications for ticketing, mobility, rental, POS, and business operations. Strong expertise in Kotlin, Jetpack Compose, Flutter, MVVM, Clean Architecture, REST API integration, Firebase services, performance optimization, release management, and reusable design systems. Proven track record of improving booking flow efficiency, reducing crash rates, and delivering production-ready mobile solutions at scale.

Skills

- Kotlin, Dart
- Android SDK, Jetpack Libraries, Jetpack Compose, Material Design, Navigation Component
- Flutter SDK
- Kotlin Coroutines, Flow, StateFlow, SharedFlow
- MVVM, Clean Architecture, Multi-Module Architecture, Modular Project Structure
- Dependency Injection with Hilt and Dagger
- REST API Integration, Retrofit, OkHttp, Dio
- Room Database, DataStore, SharedPreferences, Local Data Persistence
- Firebase Crashlytics, Firebase Analytics, Firebase Cloud Messaging (FCM), Firebase Remote Config
- Google Play Billing, In-App Purchases, Subscription Integration
- State Management with ViewModel, BLoC, Riverpod, Provider, GetX
- WorkManager, Background Tasks, Push Notifications
- Payment Gateway Integration, including SSLCOMMERZ and bKash
- Performance Optimization, Memory Management, Crash Reduction, App Stability Improvement
- UI/UX Implementation, Design Systems, Design Tokens, Reusable Component Development
- CI/CD, Git, Github, Play Store Publishing, Release Management

Work Experience

Senior Software Engineer II

Jan 2022 – Present

Jatri Services Ltd | Rubayet tower, R-24 Gulshan 2, Dhaka

- Led Android and Flutter development across bus ticketing, rental, and POS products, using Kotlin, Jetpack Compose, Flutter, MVVM, and Clean Architecture.
- Delivered features for a bus ticketing app handling BDT 200M+ in daily sales, improving booking flow efficiency by 15%+.
- Contributed to applications with 1M+ downloads, focusing on performance, stability, and seamless UX.
- Improved application performance by 20% through optimized architecture, rendering, and state management.
- Reduced crash-related issues by 25% and improved release stability by 20%+ through production monitoring and issue resolution.
- Cut repetitive UI development effort by 30% by building reusable design systems and shared components.
- Managed production releases, app signing, ProGuard/R8, and Play Store deployments for large-scale mobile applications.

Software Engineer

Aug 2020 – Jan 2022

Mononsoft Ltd | TMC building, New Eskaton, Dhaka

- Developed a scalable Order Management Android app using Kotlin, MVVM, and Jetpack, supporting business-critical daily operations.
- Delivered core features for product, order, inventory, and customer management, enabling the platform to handle 1,500+ submitted orders per day.
- Optimized app performance using Room, Coroutines, and caching strategies, improving responsiveness and ensuring stable offline/online functionality.
- Managed end-to-end Play Store deployment, including signing, release versioning, and ProGuard/R8 optimization.
- Collaborated with product, QA, and backend teams to improve system stability and troubleshoot production issues.

Projects

- Jatri Travel App (Android) – Ticket booking, car rental, and journey management for Android users
- Jatri Travel App (iOS) – Cross-platform ticket booking and real-time trip tracking for iOS users
- Jatri Rental Partner App – Driver-side app for ride management, vehicle operations, and partner coordination
- Jatri Intercity Seller – POS-integrated ticketing system for seat selection and receipt printing at travel agencies
- JERP Sales Solution – Sales tracking and inventory management system for field sales operations
- Ispahani Agro Ltd – Mobile app for agro-business field workflows, reporting, and operational management
- Rajendra College E-Payment – Education payment app for streamlined student fee collection and transaction records

Achievement

- Two promotions for strong performance and leadership
- Multiple Employee of the Month awards
- Improved stability and reduced crashes

Education

Bachelor of Science in Software Engineering

Daffodil International University

CGPA: 3.47 | Year: 2020
