Summary

Senior Mobile Application Developer with 5+ years of experience building and scaling production Android and Flutter applications used by 1M+ users and supporting BDT 20M+ in daily transactions. Strong expertise in Kotlin, Jetpack Compose, Flutter, Clean Architecture, performance optimization, and release engineering. Proven track record of delivering reliable, high-performance mobile products while improving app stability, user experience, and development efficiency.

Work Experience

Jatri Services Ltd

Jan 2022 – Current

Senior Software Engineer II | Rubayet tower, R-24 Gulshan 2, Dhaka

- Led Android and Flutter development for bus ticketing, rental, and POS products serving 1M+ users, driving architectural decisions and establishing Kotlin, Jetpack Compose, and Clean Architecture standards across the team.
- Engineered core booking and reservation features for a ticketing platform processing BDT 20M+ in daily sales, improving booking reliability and streamlining the end-to-end reservation experience.
- Improved application performance by optimizing rendering, state management, API handling, and app startup, delivering smoother UI interactions and more consistent performance on low- to mid-range devices.
- Strengthened production stability by implementing Firebase Crashlytics monitoring, structured error tracking, and release-focused issue triage, enabling faster identification and resolution of critical crashes.
- Designed and implemented a reusable mobile design system and shared UI components, reducing duplicated UI development and improving consistency across multiple Android and Flutter products.
- Collaborated with product, backend, QA, and design teams to deliver production features end-to-end, from technical planning and architecture through development, testing, release, and post-release monitoring.

Mononsoft Ltd

Aug 2020 – Jan 2022

Software Engineer | TMC building, New Eskaton, Dhaka

- Developed a scalable Order Management Android app (Kotlin, MVVM, Jetpack) covering product, order, inventory, and customer workflows — processing 1,500+ orders/day in business-critical operations.
- Engineered reliable offline/online sync with Room, Coroutines, and local caching, keeping the app responsive in low-connectivity field conditions.
- Managed end-to-end Play Store releases — signing, versioning, and ProGuard/R8 optimization.
- Partnered with product, QA, and backend teams to improve stability and resolve production issues quickly.

Skills

- Languages: Kotlin, Dart
- Android: Android SDK, Jetpack Compose, Jetpack Libraries, Material Design, Navigation Component, WorkManager, Lifecycle/ViewModel
- Architecture & DI: MVVM, Clean Architecture, Multi-Module Architecture, Hilt
- Async & Reactive: Coroutines, Flow, StateFlow, SharedFlow
- Networking & APIs: REST APIs, Retrofit, OkHttp, cross-platform API contract design with backend
- Local Data: Room, DataStore, SharedPreferences
- Firebase: Crashlytics, Analytics, Cloud Messaging (FCM), Remote Config
- Performance & Quality: Performance Optimization, Memory Management, Crash Reduction, ANR Reduction, App Stability
- UI/UX & Design Systems: Design Systems, Design Tokens, Reusable Component Libraries
- Testing: JUnit, Espresso, Mockito, Compose UI Test
- Release: CI/CD, Git, GitHub, ProGuard/R8, Play Store Publishing, Release Management
- Flutter: Flutter SDK, BLoC, GetX

Projects

- Travel App (Android) — Ticket booking, car rental, and journey management for Android users
- Travel App (iOS) — Cross-platform ticket booking and real-time trip tracking for iOS users
- Rental Partner App — Driver-side app for ride management, vehicle operations, and partner coordination
- Bus Ticket — POS-integrated ticketing system for seat selection and receipt printing at travel agencies
- JERP Sales Solution — Sales tracking and inventory management system for field sales operations
- Ispahani Agro Ltd — Mobile app for agro-business field workflows, reporting, and operational management
- College E-Payment — Education payment app for streamlined student fee collection and transaction records

Achievement

- Earned 2 promotions in ~3 years for high performance, technical leadership, and ownership.
- Mentored and onboarded junior engineers in Kotlin and Clean Architecture.
- Owned releases across 3 apps, delivering 40+ Play Store/App Store releases with zero rollbacks.

Education

Bachelor of Science in Software Engineering

Daffodil International University

CGPA: 3.47 | Year: 2020
